

IOE Admission Cutoff Rank - 2082 (Institute of Engineering, Nepal)

Restructured reference document. Source: PEA Association Pvt. Ltd., Thapathali, Kathmandu (01-5345730, 5357187).

Glossary of Terms Used in This Document

- R = Regular quota (general merit-based seats).
- FF = Full Fee quota (seats available on payment of full/higher tuition fee).
- F (appearing after a number, e.g. "484(F)") = Female quota rank. This is the cutoff rank specifically for female candidates within that quota (R or FF), listed alongside the overall/general rank for the same admission list.
- 1st, 2nd, 3rd (or similarly numbered) Admission List = These refer to the sequential merit/admission lists published during the FIRST phase of the IOE admission process. The 1st admission list is published first, followed by the 2nd, then the 3rd.
- Cutoff Rank = The rank of the last (lowest-ranked) student who was offered admission for that program/quota/admission list in the year 2082. A student's own entrance exam rank needs to be equal to or better than (numerically lower than or equal to) this cutoff rank to have had a chance of admission at that stage.
- A dash (-) means that no cutoff rank was published/available for that admission list (e.g., the list was not needed because all seats were already filled, or data was not published).

Important Notes for Students

- The cutoff rank shown is the rank at which a candidate was admitted in the previous year. It may not repeat exactly the same way this year, but a rank close to this cutoff generally indicates a reasonable chance of admission to that particular engineering program.
- These cutoff ranks are only for the first three admission lists, which fall under the FIRST phase of IOE's admission process. Depending on seat availability, a campus may publish admission lists up to the 3rd or 4th phase (i.e., up to the 9th or 12th admission list overall). Therefore, students who did not get admission during the first phase (lists 1-3) may still get an opportunity to be admitted during a later phase (lists 4-6, 7-9, or 10-12).
- This list does not show the cutoff rank for any quota category other than the Female (F) quota. Cutoff ranks for other reserved quotas (such as Dalit, Janajati, disability, remote area, etc.) are not included here.
- After a campus publishes its admission list, the list may later be revised (some ranks may move slightly up or down in certain departments) if a student's complaint or objection about the list is accepted by the campus.

IOE Admission Process - Phases and Admission Lists

The IOE admission process is organized into four sequential admission phases. Each phase covers three consecutively numbered admission lists, as follows:

- Phase 1 (1st Admission Application Call) covers Admission List 1, Admission List 2, and Admission List 3.
- Phase 2 (2nd Admission Application Call) covers Admission List 4, Admission List 5, and Admission List 6.
- Phase 3 (3rd Admission Application Call) covers Admission List 7, Admission List 8, and Admission List 9.
- Phase 4 (4th Admission Application Call) covers Admission List 10, Admission List 11, and Admission List 12.

If a student passed the entrance exam but did not fill the admission form during Phase 1 (Admission Lists 1-3), the student can fill the form during Phase 2 (Admission Lists 4-6), and so on for later phases. Similarly, if a student could not get admission during Phase 1, they can try again during Phase 2, and so on.
